### 11.04.11 Youth Environment Workshop

On April 11th at the Neeka centre in Mukachevo, Ukraine, a movie called "Home" was screened to local and refugee children to promote a discussion about global environmental issues. The film was a great success and children young and old were inspired to do drawings on this theme as well as to write down their observations and thoughts. Everyone agrees steps must be taken in both developed and developing countries as we all share just one planet.
